Despite its small size, Rufus provides everything you need!

Oh, and Rufus is **fast**. For instance it's about twice as fast as UNetbootin, Universal USB Install Windows 7 USB download tool, on the creation of a Windows 7 USB installation drive from an IS also marginally faster on the creation of Linux bootable USB from ISOs. [1]
A non exhaustive list of Rufus supported ISOs is also provided at the bottom of this page. [2]
